## PROJECTS

### Lead Webmaster website redesign — [troop677.org](http://troop677.org)

- Spearheaded a small team of my peers to redesign our homepage utilizing custom HTML, CSS, and JS, enhancing the online presence of our Boy Scout troop.
- Collaboratively resolved design challenges, ensuring a user-friendly interface and seamless navigation.

### Network-attached storage device — personal project

- Designed and implemented a NAS device hosted on a Raspberry Pi on my home network, enabling secure and efficient data storage and access.
- Configured network settings and addressed security concerns to ensure safe and reliable data retrieval.
